Place

```
graph LR; A[AAX_BigEndianNativeSwapSequenceInPlace] --> C[AAX_EndianSwapSequenceInPlace]; B[AAX_LittleEndianNativeSwapSequenceInPlace] --> C;
```

The diagram illustrates a relationship between three AAX swap sequence functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'AAX_BigEndianNativeSwapSequence' followed by 'InPlace' on a new line. The bottom box contains 'AAX_LittleEndianNativeSwap' followed by 'SequenceInPlace' on a new line. On the right, a gray rectangular box contains the text 'AAX_EndianSwapSequenceIn' followed by 'Place' on a new line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both functions inherit from or are related to the 'AAX_EndianSwapSequenceInPlace' function.
